

Montreux

Located on shore of Lake Geneva in the south-west, french speaking part of Switzerland, Montreux offers to the visitors a breathtaking view on the lake and on the mountains. This little district of 25'000 inhabitants, seeming to be a sleepy place, is in reality full of surprises. Due to its sunny climate, Montreux is considered to be the Pearl of the Swiss Riviera which is not only right on the edge of the lake, but is also within walking distance of the town's hotels, restaurants, casino and shopping area. A veritable Montreux speciality, their vegetal sculptures add a most original artistic touch to the whole lakeside area.

Montreux owns many historical sites such as the Chillon Castle, an extraordinary fortified mediaeval castle on Lake Geneva (Lac Léman), surrounded by mountains, and a wide choice of excursions, either by Panoramic Train, Bus, Boat or Funiculars.

Each year in July, the Montreux Jazz festival, well known over the world, welcomes the most famous musicians and generates the venue of thousands of people.

Moreover, Montreux is a wine-producing region. The Lavaux vineyards have been part of the UNESCO World Heritage Programme since 2007. To make the most of the long hours of sunshine, man reduced the slopes by forming terraces in order to produce a highly appreciated wine called Chasselas.

Many celebrities were attracted by the beauty of this town. Among the most famous are Victor Hugo, Gustave Eiffel, Charlie Chaplin, Gandhi and Freddie Mercury.

The nearest airport is Geneva Cointrin International Airport (Geneva-Montreux: one hour by car or train). All major international airlines take off and land at Zurich Kloten International Airport. (Zürich-Montreux: about 2h30 by car or 2h50 by train)

4th ICIS Expert Meeting Changes in ITP of Children and Adults

Montreux, Switzerland,
September 13-15, 2012

Preliminary Program

Words of Welcome

On behalf of the Intercontinental Cooperative ITP Study Group (ICIS) it is a pleasure for us to invite you to attend the 4th Intercontinental Cooperative ITP Expert Meeting in Switzerland on Changes in ITP of Children and Adults. We will celebrate 15 years of worldwide cooperation. Our work is updated in our website www.itpbasel.ch. At the first Expert Meeting in Switzerland 2003 at Bürgenstock we recognized where we are with ITP, at Yverdon les Bains 2006 we designed the future research, especially new definitions, terminologies and scoring systems, which resulted in the harmonization working group report (Blood 2009). At Basel 2009 the priorities of ITP research were discussed. Now, in 2012, we will focus on the achievements and consequences by expert's talks and 6 seminars (see scientific program). In the "Patient related outcome (PRO)" lecture and seminar delegates of patient groups of UK, USA and NL will present their activities.

Again we will publish our meeting contents in a peer reviewed supplement. All representatives of our 76 cooperative institutions those, who are interested in a future cooperation, and delegates of the pharmaceutical industries – be it as a chairperson, speaker, author or discussant – are welcome.

As usual ICIS will cover the costs of the 2 days meeting. The travelling has to be organized by the participants.

The scientific and social program at the border of Lake Geneva will be an opportunity to actively participate and discuss issues of ITP and friendship.

We are looking forward to seeing you in Montreux in September 2012.

Thomas Kühne Paul Imbach

Local Organizing Committee

Paul Imbach
Thomas Kühne
Johannes Rischewski
Monika Imbach
Caroline Martin Asal
Verena Stahel
